an **MCLE program** by
Japanese American Bar Assn. (JABA) & Asian Pacific American Legal Ctr. (APALC)

Substance Abuse *in the* Legal Profession

Prevention, Detection & Treatment

Presenter: David Mann, Northern California Consultant of The Other Bar
In this hour-long program, Mr. Mann explains the chemistry of addiction and alcoholism and their behavioral and health impacts. He considers the personality traits of attorneys and the qualities of the legal profession that combine to make lawyers particularly susceptible to addiction and difficult to treat. The presentation includes a case study of an addict attorney, a self-diagnosis exercise, and a review of systemic and individual solutions. This serious topic is approached in a manner that both incorporates humor and invites attorneys to engage in a bit of self-reflection.

Wednesday, November 28, 2012
